GHC75

Preliminary Product Guide

ASME B30.5
Metric 75% and Imperial 75%

Features

- 70 t (75 USt) capacity
- 11 m - 36 m (36 ft - 118 ft 1 in) four-section full power boom
- 15 m (49 ft 3 in) offsettable boom extension
- 100% pick and carry load charts
- Cummins QSB 6.7L Tier 4 final compliant engine

GROVE GHC75

The mid-range GHC75 delivers powerful agility and boom length of 11 m - 36 m (36 ft - 118 ft 1 in).

Features

> Comfort redefined

Operators cab is designed to deliver maximum comfort while incorporating conveniently located joystick controls for precise operation. Cab comes equipped with an integrated rated capacity limiter, air suspension seat, color monitor for up to four cameras, and precise climate control. The cab can tilt up to 20° providing the operator additional comfort when working at long boom and extension lengths.

> Travel made easy

Transportation to the job site can easily be accomplished in one to two loads. Set up time is minimal thanks to the GHC75's quick self-assembly system and hydraulically installed counterweights. When set up the strong undercarriage provides 100% pick and carry capability and work up to 4° of inclination. The hydraulically extendable tracks allow for maximum flexibility on the job site.

> Strong telescopic boom

The GHC75 comes equipped with a robust full-power four-section boom that allows for telescoping under load. The main boom offers 11 m - 36 m (36 ft - 118 ft 1 in) of reach. This paired with the standard 8m (26 ft 3 in) offsettable swing away extension provides a max tip height of 46 m (151 ft).

> CraneSTAR is an exclusive and innovative crane asset management system

that helps improve your profitability and reduce costs by remotely monitoring critical crane data. Visit www.cranestar.com for more information.

Job site benefits

More productive in more places on the job site

The GHC75 delivers unsurpassed maneuverability and versatility.

- Telescoping boom, plus heavy-duty crawler tracks for all-terrain productivity
- Superior gradeability
- High visibility cabs with up to 20° tilt
- Two-speed hydrostatic drive allows for skid steering and counter-rotation capability
- Compact design allows you to work in more places

Rugged durability to tackle all terrain

The GHC75 comes equipped with a durable, powerful crawler system.

- Hydraulically extendable and retractable crawlers
- Heavy-duty, 900 mm (36 in) triple bar, maintenance-free track shoes
- Cummins QSB Tier 3 or Tier 4 Final diesel engines power through terrain challenges

Easy transport to the job site and quick assembly

The GHC75 helps you spend less time on the truck and more time on the job.

- Transports to the job site in one to two loads
- Retracted gauge for transport width
- Self-assembly counterweight
- Excellent serviceability keeps you up and running

Manitowoc Crane Care when you need it.

The assurance of the world's most advanced crane service and support to get you back to work fast.

Manitowoc Finance helps you get right to work generating profits for your business.

Financial tools that help you capitalize on opportunity with solutions that fit your needs.

Dimensions

Transport dimensions and weights

Operating weight: approximately 71 760 kg (158,200 lb) (with 8 m (26 ft 3 in) boom extension, 2 hoists.
900 mm (36 in) triple bar shoes, 17 440 kg (38,450 lb) counterweight and 8 000 kg (17,637 lb) carbody counterweight.

Transport weight: approximately 46 320 kg (102,113 lb) with (8 m (26 ft 3 in) boom extension, 2 hoists, without counterweight, without carbody counterweight.

Transport weight: approximately 54 320 kg (119,750 lb) with (8 m (26 ft 3 in) boom extension, 2 hoists, without counterweight, with carbody counterweight.

Dimensions

Transport dimensions and weights

		Carbody counterweight	2x	4000 kg (8818.5 lb)
		Counterweight support arm	1x	590 kg (1300 lb)
		Base plate for counterweight	1x	440 kg (970 lb)
		Counterweight	4x	4250 kg (9370 lb)
		Boom extension - 8 m (26 ft 3 in)		730 kg (1609 lb)
		Fly jib extension - 7 m (23 ft)		305 kg (672 lb)
		Auxiliary boom nose		50 kg (110 lb)

Note:

Additional safe working loads are also available for 2° and 4° inclines.

Boom extension options

• **Boom extension 8 m (26 ft 3 in)**
maximum 2-strand, possible offset angle 0°/20°/40°

• **Boom extension w/ optional fly jib
15 m (49 ft 3 in)**
maximum 1-strand, possible offset angle 0°/20°/40°

• **Auxiliary boom nose**
maximum 1-strand

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane

Load handling

Weight reductions for load handling devices		
8 m - 15 m (26.2 ft - 49.2 ft) Boom extension:		
	Without block or ball	With 80 kg (176 lb) headache ball
*8 m (26.2 ft) extension (erected)	1295 kg (2416 lb)	1240 kg (2736 lb)
*15 m (49.2 ft) extension (erected)	1755 kg (3871 lb)	1953 kg (4305 lb)
Hook blocks and Headache ball:		
60 t (66 USt), 6 sheave		850 kg+ (1875 lb+)
35 t (38.5 USt), 3 sheave		270 kg+ (595 lb+)
5 t (5.5 USt) headache ball		80 kg+ (176 lb+)

*Reduction of main boom capacities
+Refer to rating plate for actual weight

When lifting over swingaway and/or jib combinations, deduct total weight of all load handling devices reeved over main boom nose directly from swingaway or jib capacity.

NOTE: All load handling devices and boom attachments are considered part of the load and suitable allowances **MUST BE MADE** for their combined weights. Weights are for Grove furnished equipment.

Line pulls and reeving information			
Hoists	Cable specs	Permissible line pulls	Nominal cable length
Main and auxiliary	16 mm (5/8") Verotop Rotation Resistant (non-rotating) Min. breaking strength 24 900 kg (54,895 lb)	5000 kg (11,000 lb*)	205 m (672 ft)
Main and auxiliary	6 mm (5/8") 35x7 Class Rotation Resistant (non-rotating) Min. breaking strength 27 760 kg (61,200 lb)	5000 kg (11,000 lb*)	205 m (672 ft)

The approximate weight of Verotop 16 mm (5/8") wire rope is 1,25 kg/m (0.84 lb/ft). The approximate weight of 35x7 class 16 mm (5/8") wire rope is 1,5 kg/m (1.0 lb/ft).

* With certain boom and hoist tackle combinations, the allowable line pull may be limited by hoist performance. Refer to Hoist Performance table for lift planning to ensure adequate hoist performance on drum rope layer required.

Hoist performance			
Wire rope layer	Hoist line pulls	Drum rope capacity	
	Available*	Layer	Total
1	7678 kg (16,928 ft)	26,5 m (86.8 ft)	26,5 m (86.8 ft)
2	7204 kg (15,883 ft)	28,2 m (92.5 ft)	54,7 m (179.3 ft)
3	6785 kg (14,959 ft)	29,9 m (98.2 ft)	84,6 m (277.5 ft)
4	6412 kg (14,137 ft)	31,7 m (103.9 ft)	116,3 m (381.4 ft)
5	6078 kg (13,400 ft)	33,4 m (109.7 ft)	149,7 m (491.1 ft)
6	5777 kg (12,736 ft)	35,1 m (115.3 ft)	184,8 m (606.4 ft)
7	5504 kg (12,135 ft)	36,9 m (121.1 ft)	221,7 m (727.5 ft)

*Max lifting capacity: Verotop and 35x7 class rope = 5000 kg (11,000 lb)

Working area diagram

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane

Specifications

Upper carriage

Boom

11 m – 36 m (36 ft – 118 ft 1 in) Four section, full power, sequenced-synchronized, telescopic boom.

Maximum tip height: 38 m (125 ft)

Boom extension

8 m (26 ft 3 in) offsettable, solid, one piece swingaway extension. Extension can be offset at 0°, 20°, and 40°

Maximum tip height: 46 m (151 ft)

*Optional Boom Extension

7 m (23 ft) offsettable fly jib extension that must be used in conjunction with standard 8 m (26 ft 3 in) boom extension. This provides a total of 15 m (49 ft 3 in) of additional reach. The optional fly jib extension can not be stowed on boom.

Maximum tip height: 52,7 m (173 ft)

Boom extension can be offset 0°, 20°, and 40°

Boom nose

Seven nylatron sheaves on heavy duty roller bearings with removable rope guards. Quick reeve type boom nose.

Equipped with removable auxiliary boom nose.

Boom elevation

One double-acting hydraulic cylinder with integral holding valves. Elevation: -3° to 81°

Rated Capacity Limiter and anti-two block system

Graphical display of load moment and anti-two block system with audio-visual warning and control lever lockout. These systems provide electronic display of crane configuration, boom angle, length, radius, tip height, maximum permissible load, momentary load and warning of impending two-block condition. Includes advanced diagnostics system that increases the performance of the machine, simplifies and accelerates troubleshooting, and lowers operating costs. Equipped with event recorder.

Counterweight

Upper weight: 17 440 kg (38,450 lb) total (5 - pieces)

Carbody weight: 8000 kg (17,637 lb) total (2 - pieces)

Cab

Large capacity operator's compartment that includes an air suspended operator's seat with lumbar support, heated seat, headrest, three inch safety belt, ergonomic control panels, load sensing electric dual axis joystick controls, travel pedals and levers, exceptional sound insulation, sliding door (includes sliding window), excellent all around visibility, tinted safety glass, front tiltable window, large skylight w/ sun protection, windshield and roof wiper/washer system, radio w/ CD player, climate control (A/C, heat, and defrost), fire extinguisher, and 20° tilt capability for improved overhead vision and ergonomic posture. Also equipped with a seven inch monitor in cab for rear view, right side, and hoist cameras.

Swing

Two speed, compact planetary gears with slant axis hydraulic motor and integrated brake valves. Sealed, externally geared slewing ring that allows for 360° of continuous rotation. Electronically applied service brake operated via foot pedal. Spring applied, hydraulically released parking brake. One position, hydraulically pinned house lock.

Swing speed: 0-2 rpm, variable

Hydraulic system

Load sensing / LUDV hydraulic system with hydraulic and pilot controlled work functions, and load limit sensing control. Single variable-displacement piston pump with a three section gear pump.

Maximum output: 375 LPM (99 GPM)

Maximum operating pressure: 330 bar (4786 psi)

765 L (202 gal) steel hydraulic reservoir with sight level gauge.

High performance, 3 micron filtration system with water absorption contamination indicator for higher oil purity and extended oil service life.

Hoist (main and auxiliary hoist)

Single speed hoists driven via a slant axis hydraulic motor with compact planetary gear. Spring loaded disc brake. Grooved drum with drum rotation indicator for both hoists that is located in the joystick controls.

Maximum hoist pull (first layer): 7678 kg (16,928 lb)

Maximum permissible single line pull: 4990 kg (11,000 lb)

Maximum single line speed: 115 m/min (380 ft/min)

Rope construction: 35 X 7 Rotation Resistant

Rope diameter: 16 mm (5/8 in)

Rope length: 205 m (673 ft)

Engine (Tier 4)

Cummins QSB 6.7 L diesel, six cylinders, turbocharged with Cummins Compact Catalytic exhaust and Selective Catalytic Reduction.

Meets U.S.E.P.A Tier 4 final requirements.

168 kW (228 bhp) at 2000 rpm.

Fuel requirements: Maximum of 15 ppm sulphur content (Ultra Low Diesel Fuel). DEF (Diesel exhaust fluid) required for SCR (selective catalytic reduction).

NOTE: Tier 4 engine Required for sale in North America.

Engine (Tier 3)

Cummins QSB 6.7 L diesel, six cylinders, turbocharged rated at 164 kW (218 bhp) at 2000 rpm.

NOTE: Required for sale outside of North America.

Fuel tank capacity

Diesel Fuel: 540 L (143 gal)

DEF (Diesel Exhaust Fluid): 38 L (10 gal)

Electrical system

24 Volt with two 12-volt maintenance free batteries. Includes battery disconnect switch.

Specifications

Lights

Lighting package includes two halogen lights integrated into the front side of the cab roof and one LED headlight on the upper carriage, right side.

Lower Carriage

Frame

Durable all steel welded construction with extendable cross members.

Side frames

Steel frames that can be hydraulically extended or retracted via controls in the cab. 900 mm (36 in) triple bar maintenance free track shoes.

Retracted gauge (transportation only): 2,3 m (7 ft 6 in)

Intermediate gauge: 3,2 m (10 ft 6 in)

Extended gauge: 4,1 m (13 ft 6 in)

*Note: These widths are from centerline to centerline of crawlers.

Travel

2 speed hydrostatic drive operated via lever/pedal controls in cab. Allows for excellent maneuverability with skid steering and counter-rotation. Both side frames are hydraulically driven thru a two stage hydraulic traction motor. Spring-loaded, hydraulically venting disk brake activated via foot pedal in cab.

Travel Speed: Max Low Range – 0,93 kmh (0.58 mph)

Max High Range – 2,7 kmh (1.68 mph)

Gradeability (theoretical): 64%

Operating weight

71 760 kg (158,200 lb) base machine configuration that includes 36 m (118 ft 1 in) boom, 8 m (26 ft 3 in) extension, 35 t (38.5 Ust) hook block, 900 mm (36 in) triple bar shoes, main and auxiliary hoist, 17 440 kg (38,450 lb) counterweight, and 8000 kg (17,637 lb) carbody.

Ground bearing pressure (no load): .77 kg/cm² (10.95 psi)

Miscellaneous standard equipment

- Central, easily accessible lubricating strip for slewing ring.
- Grated platforms in front and on the side of the cab, as well as catwalks on both sides of the upper carriage. Foldable handrails included for upper carriage.
- Storage box attached to the rear carbody weight.
- Service friendly engine and hydraulic compartments with decoupled engine suspension, sound proofing, and lighting.
- 35 t (38.5 USt) 3 - sheave, quick reeve hook block
- External RCL light bar
- CraneStar asset management system

* Optional equipment

- Auger Ready Package: includes hoses and pipes at the base boom, auger hydraulic circuit 150 l/min (39 gpm), 200 bar (2900 psi), controls and switches in the cab for auger operation.
- Auger Motor and Kelly Bar: includes stowage brackets, hydraulic hoses to connect to the auger ready package plumbing, the auger motor, and Kelly bar.
- Auger Flightings: 609 mm (24 in), 914 mm (36 in), and 1219 mm (48 in) available.
- Pole Claw Preparation / Tool Circuit: Provides 35 l/min (9 gpm), 176 bar (2500 psi) through a 32 m (105 ft) hose reel with quick disconnect fittings, switch for tilting and clamping function, controls and switches in the cab.
- Pole Claw
- Basket: Yoke style, 1829 mm x 914 mm (72 in x 36 in) steel basket, gravity hung with cylinder brake lock (does not side stow). Includes quick-attach boom attachment. Basket capacities: 544,3 kg (1200 lb) main boom and 226,7 kg (500 lb) on jib.
- Radio Remote Control Package
- Cold Weather Packages up to -40° C / 40° F
- Swing Barrier Protection
- Maintenance free flat track shoes
