

5519 (supersedes 5485) – 0208 – R4

Technical Data

Specifications & Capacities

ATC 3250

Telescopic Boom All Terrain Crane
250 ton (220.0 metric ton)

CAUTION: This material is supplied for reference use only. Operator must refer to in-cab Crane Rating Manual and Operator's Manual to determine allowable crane lifting capacities and assembly and operating procedures.

Boom, Attachments, and Upper Structure

■ Boom

Design – Seven section, formed construction of extra high tensile steel consisting of one base section and six telescoping sections. The two plate design of each section has multiple longitudinal bends for superior strength. Each telescoping section extends independently by means of one double-acting, single stage hydraulic cylinder with an integrated holding valve.

Boom

- 43.3–223.1 ft (13.2–68.0m) seven section boom
- Four pinned positions of 0%, 46%, 92%, and 100% on each boom section provide thirty-eight extend combinations for superior capacities when varying the extension of the telescoping sections, controlled from the operator's cab.
- Integral boom dolly connection
- Mechanical boom angle indicator
- Wind speed indicator
- Maximum tip height for the following boom lengths are:

Boom Length (Pinned Positions)		Tip Height	
ft	m	ft	m
223.1	68.0	234.4	71.5
208.0	63.4	219.4	66.9
194.2	59.2	205.9	62.8
180.4	55.0	192.2	58.6
167.0	50.9	178.6	54.4
153.2	46.7	164.9	50.3
139.4	42.5	151.3	46.1
125.7	38.3	137.6	41.9
111.9	34.1	124.0	37.8
98.4	30.0	110.3	33.6
84.6	25.8	96.7	29.3
70.9	21.6	83.0	25.3
57.1	17.4	69.4	21.2
43.3	13.2	55.8	17.0

Boom Head

- Seven 18.2 in (46.2cm) root diameter nylon sheaves to handle up to fourteen parts of line
- Easily removable wire rope guards
- Rope dead end lugs on one side of the boom head
- Boom head is designed for quick-reeve of the hook block

Boom Elevation

- One double acting hydraulic cylinder with integral holding valve
- Boom elevation: -1.5° to 84°
- **Load Comp** – Load compensator maintains a consistent radius during load lift-off by automatically elevating boom hoist cylinder. Operated by a switch from the operator's cab.

Auxiliary Lifting Sheave – Optional

- Single 18.2 in (46.2cm) root diameter nylon sheave
- Easily removable wire rope guards
- Does not affect erection of the fly or use of the main head sheaves

Heavy Duty Lifting Sheave Package – Optional

- Two 18.2 in (46.2cm) root diameter nylon sheaves
- Easily removable wire rope guards
- Does not affect erection of the fly or use of the main head sheaves
- Necessary to achieve greater than 15 parts of line lifts

Hook Blocks and Balls – Optional

- 27.6 ton (25.0mt) 1 sheave quick-reeve hook block with safety latch
- 88.2 ton (80.0mt) 5 sheave quick-reeve hook block with safety latch
- 140 ton (127.0mt) 7 sheave quick-reeve hook block with safety latch
- 200 ton (181.4mt) 11 sheave quick-reeve hook block with safety latch
- 11 ton (10.0mt) swivel hook ball with safety latch

Fly – Optional

- 17.7 ft–43.3 ft (5.4–13.2m) two piece lattice fly, stowable, offsettable to 0° , 20° , and 40° . Maximum tip height is 279.5 ft (85.2m).

Fly Inserts – Optional

- Four 19.7 ft (6.0m) lattice inserts to be mounted between the 17.7 ft (5.4m) lattice fly base and the 25.6 ft (7.8m) lattice fly tip option. Maximum tip heights for the following fly lengths are:

Fly Length		Tip Height	
ft	m	ft	m
63.0	19.2	298.9	91.1
82.7	25.2	318.6	97.1
102.4	31.2	338.3	103.1
122.1	37.2	358.0	109.1

■ Upper Operator's Cab and Controls

Environmental Cab – Fully enclosed, one person cab of composite (fiberglass and steel) structure with acoustical insulation. Equipped with:

- Tilting interior where the operator's seat, joystick controllers, floor controls and pedals, and main console tilt with in the cab
- Tinted and tempered glass windows
- Extra-large power up/power down front window with windshield wiper and washer
- Fixed roof window with windshield wiper
- Sliding left side door with large fixed window
- Fold out rear window for ventilation
- Fixed right side window
- Six way adjustable, cushioned seat with headrests, adjustable lumbar support, and seat belt
- Engine dependent warm-water heater with air ducts for front windshield defroster and cab floor
- AM/FM stereo with single disc CD player
- 12 volt and 24 volt power connections
- Engine hourmeter
- Rated capacity limiter override
- Adjustable sun visor
- Dome light
- Cup holder
- Fire extinguisher
- Left side viewing mirror
- Integral recessed cabwalks
- One position travel swing lock

Air Conditioning – Integral with cab heating system utilizing the same ventilation outlets

Armrest Controls – Two dual axis electronic joystick controllers for:

- Swing
- Boom hoist
- Boom telescope
- Main front winch
- Auxiliary rear winch – optional
- Drum rotation indicator(s)
- Winch high/low speed and disable switch(es)
- Free swing/automatic swing brake switch
- Auxiliary winch/telescope switch
- High speed function button
- Warning horn

Foot Controls

- Swing brake
- Engine throttle

Front Main Console – Controls and indicators for:

- Emergency shut down switch
- Central warning indication
- Outrigger controls

Right Side Console – Controls and indicators for:

- Auxiliary winch disable switch
- Swing override switch
- Drum rotation indicator activation switch
- Telescopic override switches
- Engine shutdown switch
- Anti-two block override switch

Right Side Overhead Console – Controls and indicators for:

- Central lubrication system switch
- Boom and cab floodlight switches
- Top windshield wiper switch
- Front windshield wiper and washer switch
- Power up/power down front windshield switch
- Tilting interior switch
- Battery main shutoff switch
- Supplementary heater controls

Cockpit Graphic Control (CGC) – Ergonomically positioned on the front main console, digital instrumentation, and control for crane operations including:

- Engine coolant temperature
- Electronic bubble level and levelness readout
- CAN-BUS diagnostic and engine electronic fault indicator
- Swing lock indicator
- Hydraulic oil and air cleaner filter indicator
- Hydraulic oil temperature
- Low engine oil pressure indicator
- Low voltage indicator
- Fuel level
- Carrier engine start and stop
- Carrier park brake indicator
- Suspension lock indicator
- Axle lift indicator
- Outrigger operation
- Outrigger force readout – optional

Rated Capacity Limiter – Graphic audio-visual warning system integrated into the front main console with anti-two block and function limiter. Operating data available includes:

- Crane configuration
- Boom length and angle
- Boom head height
- Allowed load and % of allowed load
- Boom angle
- Radius of load
- Actual load
- Wind speed
- Operator settable alarms (include):
 - Maximum and minimum boom angles
 - Maximum and minimum tip height
 - Maximum boom length
 - Left/right swing positions
 - Work radius

Swing

Motor/Planetary – Bi-directional hydraulic swing motor mounted to a planetary reduction unit for 360° continuous smooth swing at 1.8 rpm. Free swing capable when controller within the operator's cab is in the neutral position.

Swing Park Brake – 360°, electric over hydraulic, (spring applied/hydraulic released) multi-disc brake mounted on the reduction unit. Operated by a switch from the operator's cab.

Swing Brake – 360°, foot operated, hydraulic applied disc brake mounted to the reduction unit.

Swing Lock – One-position swing lock (boom over rear) operated from the operator's cab.

Automatic Swing Brake Mode – Swing brake applies when controller within the operator's cab is in the neutral position. Operated by a switch from the operator's cab.

360° Positive Swing Lock – Optional – Meets New York City requirement.

Central Lubrication System

Automated lubrication unit that injects grease into the turntable bearing, boom hoist cylinder pins, boom foot pin, and the main (front) and auxiliary (rear) winch. Operated by a switch from the operator's cab.

Electrical

Two batteries provide 24-volt operation and starting. CAN bus wiring and components, and integral self-test CSS (Control & Service System).

Swing Alarm – Audio warning device signals when the upper is swinging.

Lights

- Two working lights on front of the cab
- One rotating amber beacon on the right side of the main winch
- One boom floodlight on the boom base section
- Two side marker lights on the boom head

Hydraulic System

Main Pumps

- Two variable displacement piston pumps for the main and auxiliary winches, boom hoist and telescope
- One fixed displacement piston pump for swing
- One fixed displacement gear pump for pilot pressure
- One fixed displacement gear pump for counterweight
- The upper engine powers the pumps. Combined pump capacity of 178.2 gpm (674Lpm).
- Remote mounted, auxiliary hydraulic oil cooler

Pump Control “fine inching” Mode – Special fine metering pump settings, selectable from the operator's cab, allows very slow movements to the main and auxiliary winches, boom hoist, and swing for precision work.

Pump Control “high speed” Mode – Boosts hydraulic oil flow by combining the two variable displacement piston pumps for the main and auxiliary winches, boom hoist up, and telescope extend. Operated by a button on the right joystick controller from the operator's cab.

Hydraulic Reservoir – 291 gal (1 100L) capacity equipped with sight level gauge. Diffusers built in for deaeration.

Filtration – One 12 micron, full flow, line filter in the control circuit. All oil is filtered prior to return to sump tank. Accessible for easy filter replacement.

Counterbalance Valves – All hoist motors, boom extend cylinders, and boom hoist cylinders are equipped with counterbalance valves to provide load lowering and prevents accidental load drop when hydraulic power is suddenly reduced.

Boom Hoist Float Valves – For transporting the boom over the rear of the crane with a boom dolly. Allows hydraulic oil within the boom hoist cylinder to flow between piston side and case side.

Swing Brake Release Valve – For transporting the boom over the rear of the crane with a boom dolly. Holds the 360° swing park brake in the release position allowing free rotation of the upperstructure.

Pump Drive

All functions are hydraulically powered allowing positive, precise control with independent or simultaneous operation of all functions.

Fuel Tank

One 66.0 gal (250L) capacity tank.

Engine

Specification	Mercedes Benz OM 906 LA
Numbers of cylinders	6
Cycle	4
Bore and Stroke: inch (mm)	4.02 x 5.12 (102x130)
Piston Displacement: in ³ (cm ³)	388.72 (6 374)
Max. Brake Horsepower: hp (kW)	185 (138) @ 1,800 rpm
Peak Torque: ft lb (Nm)	553 (750) @ 1,200 rpm
Alternator: volts – amps	24 – 30
Crankcase Capacity: qt (L)	30.64 (29)
• Webasto Engine/Cab Heater – Diesel fired heating unit that can be used for preheating of the engine, or for engine preheating combined with heating of the operator's cab.	

Main (Front) and Auxiliary (Rear) Winches – 0.83 in (21mm) Rope										
Layer	Maximum Line Pull		Normal Line Speed		High Line Speed		Layer		Total	
	lb	kg	ft/min	m/min	ft/min	m/min	ft	m	ft	m
1	24,504	11 115	207	63.2	332	101.1	176	53.7	176	53.7
2	22,706	10 299	226	68.8	361	110.0	192	58.5	368	112.2
3	20,907	9 483	244	74.3	390	119.0	207	63.2	575	175.4
4	19,558	8 872	262	79.9	420	127.9	223	68.0	799	243.4
5	18,210	8 260	281	85.5	449	136.8	239	72.7	1,037	316.1
6	17,085	7 750	299	91.1	478	145.8	254	77.5	1,291	393.6
7	15,961	7 240	317	96.7	508	154.7	270	82.2	1,561	475.8

Wire Rope Application	Diameter		Type	Maximum Permissible Load	
	in	mm		lb	kg
Main (Front) Winch	0.83	21	16 x 7 rotation resistant – right lang lay	17,175	7 790
Auxiliary (Rear) Winch	0.83	21	16 x 7 rotation resistant – right lang lay	17,175	7 790

Load Hoist System

Main and Auxiliary (Optional) Winches

- Axial piston, constant displacement motors driven through planetary reduction unit for positive control under all load conditions
- Grooved lagging
- Power up/down mode of operation
- Third wrap indicator with function lockout
- Drum rotation indicator
- Wire rope with “Superstop” easy reeving system
- Drum diameter: 20.67 in (525mm)
- Rope diameter: 0.83 in (21mm)
- Rope length:
 - Main: 1,148 ft (350m)
 - Auxiliary: 1,148 ft (350m)

Integrated Third Wrap Indicator – Rated capacity limiter color display visually and audibly warns the operator when the wire rope is on the first/bottom layer and when the wire rope is down to the last three wraps.

Auxiliary winch can be removed by cranes’ counterweight removal system.

Counterweight

Standard – Total of 156,520 lb (71 000kg) of total counterweight consisting of seven hydraulically removable counterweights. Assembled and disassembled by hydraulic cylinders controlled from the operator’s cab with capacities for:

- 0 lb (0kg) counterweight
- 26,455 lb (12 000kg) counterweight
- 51,808 lb (23 500kg) counterweight*
- 77,161 lb (35 000kg) counterweight*
- 103,616 lb (47 000kg) counterweight*
- 156,527 lb (71 000kg) counterweight**

Low speed jobsite travel is offered for these counterweight configurations and a boom dolly or boom trailer may be required for on–highway travel.

* Overall width of the crane increases to 15 ft 1 in (4.6m) for this counterweight configuration.

** Overall width of the crane increases to 18 ft 5 in (5.6m) for this counterweight configuration.

Counterweight Modules			1	2	3	4	5	6	7
			4,409 lb (2 000kg) tray	22,046 lb (10 000kg) piece	25,353 lb (11 500kg) piece	25,353 lb (11 500kg) piece	26,455 lb (12 000kg) top	26,455 lb (12 000kg) piece	26,455 lb (12 000kg) piece
Counterweight Usage Configurations	Standard	0 lb (0kg)							
		26,455 lb (12 000kg)	X	X					
		51,808 lb (23 500kg)	X	X	X				
		77,161 lb (35 000kg)	X	X	X	X			
		103,616 lb (47 000kg)	X	X	X	X	X		
		156,527 lb (71 000kg)	X	X	X	X	X	X	X

Carrier

General

- 9 ft 10 in (3.0m) wide with 20.5R25 tires
- 27 ft 10 in (8.5m) wheelbase (centerline of first axle to centerline of fifth axle)
- **Frame** – Box-type, torsion resistant, welded construction made of high tensile steel. Equipped with front and rear towing and tie-down lugs, tow connections, and access ladders.

Outriggers

Boxes – Two double box, front and rear welded to the carrier frame

Beams and Jacks – Four dual stage beams with Confined Area Lifting Capacities (CALC) provide selectable outrigger extensions of full and intermediate positions. Jacks with integral check valves, hydraulically controlled from the operator's cab and on both sides of carrier. Automatic leveling.

Pontoons – Four lightweight, stow'n go, 23.6" (60.0cm) square nylon pontoons with a contact area of 558 in² (3 600.0cm²) can be stored for road travel under the outrigger boxes.

Main Jack Reaction – 277,000 lb (1 232.2kN) force and 496 psi (3 419.8kPa) ground bearing pressure

Steering and Axles

- ZF–Servocom dual circuit system provides hydraulic assisted steering with a mechanical link between the steering wheel and two front axles. The two rear axles steer hydraulically and operation is based on primary and auxiliary steering modes.

Primary Steering Mode – Axles 4 and 5 will automatically steer in combination with axles 1 and 2 based on travel speed:

Primary			
Speed	Less than 15.5 mph (25km/h)	15.5–31.0 mph (25–50km/h)	Greater than 31.0 mph (50km/h)
Axle 1	Steered	Steered	Steered
Axle 2	Steered	Steered	Steered
Axle 3	Fixed (Lifted or Down)	Fixed (Lifted or Down)	Fixed (Lifted or Down)
Axle 4	Steered	Locked	Locked
Axle 5	Steered	Steered	Locked

Auxiliary Steering Modes – Five independent modes consisting of:

- **Independent Front:** Axles 1 and 2 (Axle 3 is lifted)
- **Combination:** Axles 1, 2, 4, and 5 (Axle 3 is lifted)
- **Crab:** Axles 1, 2, 4, and 5 (Axle 3 is lifted)
- **Independent Rear:** Axles 4 and 5 (Axle 3 is lifted)
- **Drive Away From Walls:** Temporary crab mode (Axle 3 is lifted)

The front, combination, and crab steering modes are controlled from the steering wheel and are selected by controls in the driver's cab. Momentary switches located in the driver's cab control the rear steering mode. Limited to 3rd gear travel.

- **Emergency Steering** – A pump is flange-mounted to the transfer box that provides hydraulic pressure to the steering circuit as long as the crane is in motion above 1.85 mph (3km/h).
- **Drive** – Two modes: 10 x 6 for highway travel: 1st, 4th, and 5th axles are driven. 10 x 8 for job-site travel: 1st, 2nd, 4th, and 5th axle are driven.
- **Axle 1** – Steered, driven for job-site travel
- **Axle 2** – Steered, driven
- **Axle 3** – Non steered, non driven, lift system
- **Axle 4** – Steered, driven
- **Axle 5** – Steered, driven
- **Inter-Axle Differential Lock** – Traction adding device that locks axles 1 and 2 with axles 4 and 5. Operated by a switch from the carrier cab.
- **Transverse (Cross-Axle) Differential Locks** – Traction adding device that locks differentials within axles 1, 2, 4, and 5. Operated by a switch from the carrier cab with a 10 second timer.

Suspension

Hydro-pneumatic, lockable with level adjustment and automatic ride height leveling. All axles have longitudinal and transverse trailing arms with leveling adjustment and locked cylinders. The carrier can be tilted laterally and longitudinally by controls in the carrier cab that adjust each individual suspension cylinder.

- Cylinder stroke: –4.6 in (118mm) / +6.2 in (158mm)

Third Axle Lift System – Axle 3 lifts independently for highway travel and job-site travel applications. Operated by a switch from the carrier cab.

Third Axle Boost – Axle 3 is presettable to a specific load-lifting when the boom is over the front. Boost range is between 17,700 lb (8 028.6kg) and 30,800 lb (13 970.6kg).

■ Ground Control Outrigger/Suspension Controls

Environmentally sealed and ergonomically positioned, control stations located on the left and right side of the carrier with controls and indicators for crane operations including:

- Starts and stops carrier engine
- Throttles carrier engine up and down
- Suspension operation including:
 - Raise and lower suspension on outriggers
 - Automatic ride height leveling on tires
- Outrigger operation including:
 - Extends and retracts two beams together
 - Extends and retracts all jacks together
 - Automatic leveling on outriggers
- Outrigger lighting
- Monitor's contrast and brightness
- Electronic bubble level
- Levelness or inclination
- One position swing lock engagement indicator
- Outrigger force readout – optional

■ Tires and Wheels

Standard – Ten (single) 20.5R25 tires on steel disc wheels.

Optional – Ten (single) 16.00R25 tires on steel disc wheels.

- Tire inflation kit
- Spare tires and wheels – optional

■ Brakes

Service – Full air brakes on all wheel ends. Dual circuit compressed air system with air dryer.

Parking/Emergency – Spring loaded type, acting on 2nd, 4th, and 5th axles

Intarder – Hydrodynamic driveline brake that is integral to the transmission. Operated by a switch from the carrier cab.

■ Central Lubrication System

Automated lubrication unit that injects grease into the steering gear arms, steering knuckles, and suspension cylinders. Operated by a switch from the carrier's cab.

■ Electrical

Two batteries provide 24–volt operation and starting. CAN bus wiring and components, and integral self–test CSS (Control & Service System).

Lights

- Front lighting includes two main headlights, two high beam lights, two fog lights, two directional indicators, and two parking lights
- Rear lighting includes two rear combination panels each with directional indicator, parking light, brake light, fog light, reversing light, and license plate light
- Other equipment includes hazard/warning system, cab light, instrument panel light, signal horn, and two amber rotating beacons on cab roof
- Four lights to illuminate the outriggers

■ Engine

Specification	Mercedes Benz OM 502 LA
Numbers of cylinders	8
Cycle	4
Bore and Stroke: inch (mm)	5.12 x 5.91 (130x150)
Piston Displacement: in ³ (cm ³)	972.04 (15 929)
Max. Brake Horsepower: hp (kW)	530 (390) @ 1,800 rpm
Peak Torque: ft lb (Nm)	1,770 (2 400) @ 1,200 rpm
Alternator: volts – amps	24 – 100
Crankcase Capacity: qt (L)	42.27 (40)
• Cruise control • Engine exhaust brake • Engine compression brake • Two thermostatically controlled, hydraulically driven radiator fans	

■ Transmission

Automated – ZF AS–TRONIC (no clutch pedal) automated manual transmission with 16 forward gears and 2 reverse gears

Auxiliary – Transfer case with high/low range

■ Fuel Tank

One 140 gal (530L) capacity tank

■ Hydraulic System

Main Pumps

- One variable displacement piston pump for the front steering circuit 1, cooling fans, suspension, and outriggers
- One fixed displacement piston pump for front steering circuit 2
- Two fixed displacement gear pumps for rear steering
- One fixed displacement piston pump for emergency steering
- The carrier engine powers the pumps. Combined pump capacity of 65.6 gpm (248Lpm).

Hydraulic Reservoir – 76.6 gal (290L) capacity equipped with sight level gauge. Diffusers built in for deaeration.

Filtration – Two 12 micron, full flow, line filter in the control circuit. All oil is filtered prior to return to sump tank. Accessible for easy filter replacement.

■ Cab and Controls

Cab – Fully enclosed, two person full width cab of composite structure with acoustical insulation. Equipped with:

- Tinted and tempered glass windows
- Windshield wiper and washer
- Slide side windows of hardened glass
- Six way adjustable and air suspended driver and passenger seats with integrated three point safety belts and headrests
- Two heated and electrically adjustable rear–view mirrors
- One heated wide angle mirror and additional turn mirror
- Engine dependent warm–water heater with defroster nozzles for windshield and cab floor
- AM/FM radio with single disc CD player
- Adjustable sun visor
- Dome light
- 12 volt and 24 volt connection
- Air conditioning
- Fire extinguisher

Cab Instrumentation – Ergonomically positioned analog instrumentation for driving including:

- Speedometer with odometer
- Transmission mode, gear indication, and travel direction
- Engine coolant temperature
- Fuel level
- Tachometer with hourmeter

Dash Mounted – Controls and indicators for:

- Battery main shutoff
- Carrier throttle (0 to 1,200 rpm)
- Carrier lighting
- Auxiliary transmission high/low range
- 10x8 drive, inter–axle lock, and transverse differential lock
- Suspension operation, automatic leveling, and lock
- Cruise and intarder activation
- Mirror heating
- Warning lamps
- Engine/gearbox malfunction with audible alarm
- Service and park brake indication
- Steering system malfunction with audible alarm

Cockpit Multi–Vision (CMV) Display – Ergonomically positioned on the driver's dash panel, digital instrumentation and indicators for crane operations including:

- Front and rear air pressure
- Air cleaner and hydraulic oil filter replacement
- Low engine oil and coolant
- Steering system malfunction
- Emergency steering activation
- CAN–BUS diagnostics
- Sensor fault
- Low voltage
- Tachometer fault
- Low fuel
- Suspension lifted and locked
- Auxiliary transmission high/low range
- Suspension leveled
- High beam headlights

- Third axle lifted
- Rear fog light activation
- 10x8 drive, inter–axle lock, and transverse differential lock
- One position swing lock engagement
- Intarder activation
- Axle oscillation activation
- Central lubrication activation
- Boom raised out of the boom rest
- Display contrast and brightness readout
- Crane service diagnostics readouts
- Electronic bubble level
- Axle loadings readouts
- Steering modes

Center Console – Controls and indicators for:

- Heating and air conditioning controls
- Transmission gear shifting
- Auxiliary steering controls
- Rear axle locking switch
- Mirror adjustments
- Park brake

Steering Column – Controls for:

- Carrier ignition
- Warning horn
- Turn indicators
- High beam headlights
- Steer wheel adjustments
- Cruise and intarder controls
- Windshield wipers and washers

Foot Controls – Controls for:

- Carrier service brakes
- Engine throttle

■ Additional Equipment

Standard:

- Pneumatic and electrical quick disconnect connectors mounted on the rear bumper for boom dolly brakes and lights
- Emergency function overrides
- Aluminum full deck fenders and ladders
- Hook block and ball bumper tie backs
- Left and right side carrier storage boxes
- Hook ball storage
- Folding ladder (stowed under the carrier cab)
- Handling slings
- Mud flaps
- Tool box with tools
- Grease gun
- First aid kit
- Tire inflation system
- Battery jumper cables

Carrier Speeds and Gradeability
