

Rough Terrain Crane 75-ton (68.00 mt)

Engine hood design provides easy access

> Transmission oil is cooled

by a thermo-

statically-

controlled

oil cooler

to provide

maximum

the most

cooling under

extreme job

conditions.

Fast & efficient hydraulic counterweight removal enhances roadability

The RTC-8075 is jam-packed with power, control & reliability!

- Caterpillar 3126B electronic engine with 225 hp (168 kW) provides 646 lb-ft (876 Nm) of torque
- Remote-mounted, thermostatically controlled oil cooler provides maximum transmission cooling under the most extreme job site conditions
- Electronic throttle for improved throttle response
- Three automotive-style batteries linked in parallel and provide 700 cold cranking amps for cold weather starting
- Rugged, lightweight steel pontoons
- Hydraulic disc brakes for both service brakes and parking brake
- Metri-Pak wire harnesses have sealed relays and connectors throughout for outstanding long-term reliability. All wires have flame retardant polyethylene insulation. resulting in a higher heat resistant wiring

4-section full power boom with attachment flexibility

- Full power 41 ft to 127 ft (12 50 m to) 38.71 m) four-section boom with two extend modes: A-max and fully synchronized
- Features the "Boss," Link-Belt's patented boom design of high strength angle cords and high formability sidewall embossments
- Maximum tip height is 202 ft (61.57 m) with the attachment and main boom used in combination
- Optional 39 ft 6 in (12.04 m) one-piece lattice fly and optional 39 ft 6 in to 67 ft (12.04 m to 20.42 m) two-piece bi-fold lattice fly are offsettable to 2°, 20° and 40°

Operator cab features

- Large front window for excellent visibility Tinted glass
- Sliding right side and rear windows and
- swing-up top window provide excellent Integral rated capacity limiter aids the
- operator in safe and efficient operation by continuously monitoring boom length, boom angle, head height, radius of load, machine configuration, allowed load and percent of allowed load

Powerful hydraulics

- For greater productivity and control, the sixpump hydraulic circuit allows simultaneous function of boom hoist, winch and swing.
- Piston motor hydraulic hoist system delivers superior hoisting. Matched sizes of main and auxiliary winches provide equal maximum available line pulls of 16,506 lbs (7 487 kg) and maximum line speeds of 454 fpm (138 m/min) on 16" (.41 m) root diameter drums.

Job site maneuverability

- Steering modes are chosen and performed with the steering wheel and include independent front steer, four wheel steer, and "crab" steering
- CALC Outrigger beams have three lifting stages (retracted, intermediate and fully extended) providing lifting capacities in confined areas

Invest in a legacy of outstanding customer support

- Distributor support personnel - Factorytrained technicians are specifically tested to establish proficiency in all aspects of crane diagnostics and repair.
- team Supporting your trained distributor personnel are experienced factory advisors with comprehensive records and technical libraries that stand ready to resolve any crane service issue.

Factory product support

- Parts Distribution Center 72,000 sq. ft. Parts Distribution Center averages an over-90% parts availability rate.
- eParts Link-Belt's online computer system links our distributors worldwide so customers can order genuine Link-Belt parts 24 hours a day, 7 days a week.
- · Link-Belt Preferred Link-Belt's customer web site provides instant access to a comprehensive library of all parts, service and operator manuals plus other technical and

RTC-8075 Link-Belt Cranes

Boom, Attachments, and Upper Structure

■ Boom

Design – Four section, box type construction of high tensile steel consisting of one base section and three telescoping sections. The vertical side plates have diamond shaped steel impressions for superior strength to weight ration. The first telescoping section extends independently by means of one double—acting, single stage hydraulic cylinder with integrated holding valves. The second and third telescoping sections extend proportionally by means of one double—acting, single stage cylinder with integrated holding valves and cables.

Boom

- 41-127 ft (12.5-38.7m) four section full power boom
- Two mode boom extension: A-max mode provides superior capacities by extending the first telescoping section to 69.6 ft (21.2m). Standard mode synchronizes all the telescoping sections proportionally to 127 ft (38.7m). Controlled from the operator's cab.
- Mechanical boom angle indicator
- Maximum tip height for A—max mode is 80 ft (24.3m) and standard mode is 136 ft (41.4m).

Boom Head

- Five 16.5 in (41.9cm) root diameter nylon sheaves to handle up to ten parts of line
- Easily removable wire rope guards
- Rope dead end lugs on each side of the boom head
- Boom head is designed for quick—reeve of the hook block

Boom Elevation

- One double acting hydraulic cylinder with integral holding valve
- Boom elevation: -3° to 78°

Auxiliary Lifting Sheave - Optional

- Single 16.5 in (41.9m) root diameter nylon sheave
- Easily removable wire rope guards
- Does not affect erection of the fly or use of the main head sheaves

Hook Blocks and Balls - Optional

- 40 ton (36.3mt) 4 sheave quick—reeve hook block with safety latch
- 60 ton (54.4mt) 4 sheave quick—reeve hook block with safety latch
- 75 ton (68.0mt) 5 sheave quick—reeve hook block with safety latch
- 8.5 ton (7.7mt) swivel and non-swivel hook balls with safety latch

Fly - Optional

(909) 222-0202

• 39 ft 6 in (12.0m) one piece lattice fly, stowable, offset-table to 2°, 20°, and 40°. Maximum tip height is 174 ft (53.0m).

39 ft 6 in –67 ft (12.0 – 20.4m) two piece bi – fold lattice fly, stowable, offsettable to 2°, 20°, and 40°. Maximum tip height is 202 ft (61.6m).

Operator's Cab and Controls

Environmental Cab — Fully enclosed, one person cab of galvaneal steel structure with acoustical insulation Equipped with:

- Tinted and tempered glass windows
- Extra—large fixed front window with windshield wiper and washer
- · Swing up roof window with windshield wiper
- · Sliding left side door with large fixed window
- Sliding rear and right side windows for ventilation
- Six way adjustable, cushioned seat with seat belt and storage compartment
- Engine dependent warm—water heater with air ducts for front windshield defroster and cab floor
- · Defroster fan for the front window
- Bubble level
- Circulating fan
- Adjustable sun visor
- · Dome light
- Cup holder
- Fire extinguisher
- Left side viewing mirror
- Two position travel swing lock

Air Conditioning – Optional – Integral with cab heating system utilizing the same ventilation outlets

Steering Column – Pedestal type with tilt and telescope functions for operator comfort. Column includes the following controls and indicators:

Left and right levers include:

- Horn button
- Turn signal switch
- · Driving light switch
- Transmission direction switch

Panel mounted switches for:

- Travel park brake
- · Steer mode selector
- 2/4 wheel drive/range selector
- Transmission gear selector
- · Hazard flasher

Panel mounted indicator/warning lights for:

- Transmission temperature
- Engine oil pressure
- Travel park brake
- Service brake
- Turn signals
- Rear wheel offset—optional
- Emergency steer optional

Armrest Controls - Two dual axis hydraulic joystick controllers or optional single axis hydraulic controllers for:

- Swing
- · Boom hoist
- Main rear winch
- Auxiliary front winch optional
- · Drum rotation indication
- · Drum rotation indicator activation switch
- Winch high/low speed and disable switch(es)
- Third wrap selector switch optional
- Telescopic override switches
- Warning horn button
- Swing park brake

Outrigger Controls - Hand held control box with umbilical cord gives the operator the freedom to view operation while setting the outriggers.

Foot Controls

- Boom telescope
- Swing brake
- · Engine throttle
- Service brake

Right Front Console - Controls and indicators for:

- Engine ignition
- Engine throttle lock
- Function disable
- Front windshield wiper and washer
- Cab floodlights
- Warning horn
- Heating controls
- Console dimmer switch
- Bubble level
- 12 volt power connection
- Air conditioning optional
 Boom floodlight optional
- · Rotating beacon/Strobe light - optional
- Third wrap indicator optional

Cab Instrumentation - Ergonomically positioned, analog instrumentation for crane operation including:

- Engine coolant temperature with warning indicator
- Hydraulic oil temperature with warning indicator
- Fuel level with warning indicator
- Tachometer
- Transmission temperature with warning indicator
- Voltmeter with warning indicator

Rated Capacity Limiter - Microguard graphic audio visual warning system integrated into the dash with antitwo block and function limiter. Operating data available includes:

- Crane configuration
- Boom length and angle
- Boom head height
- · Allowed load and % of allowed load
- · Boom angle
- Radius of load
- · Actual load
- Operator settable alarms (include):
 - · Maximum and minimum boom angles
 - · Maximum tip height
 - · Maximum boom length
 - · Swing left/right positions
 - Operator defined area (imaginary plane)

Internal RCL Light Bar - Optional - Visually informs the operator when crane is approaching maximum load capacity with a series of green, yellow, and red lights.

External RCL Light Bar - Optional - Visually informs the ground crew when crane is approaching maximum load capacity with a series of green, yellow, and red lights.

Swing

Motor/Planetary – Bi-directional hydraulic swing motor mounted to a planetary reducer for 360° continuous smooth swing at 2.1 rpm.

Swing Park Brake - 360°, electric over hydraulic, (spring applied/hydraulic released) multi-disc brake mounted on the speed reducer. Operated by a toggle switch from the operator's cab.

Swing Brake - 360°, foot operated, hydraulic applied disc brake mounted to the speed reducer.

Swing Lock – Two–position swing lock (boom over front or rear) operated from the operator's cab.

360° Positive Swing Lock - Optional - Meets New York City requirement.

■ Electrical

Swing Alarm - Audio warning device signals when the upper is swinging.

Lights

- Two working lights on front of the cab
- One rotating amber beacon on top of the cab optional
- One amber strobe beacon on top of the cab optional
- Boom floodlight optional

BTC-8075 Link-Belt Cranes

- 2M Main and Optional Auxiliary Winches
 Axial piston, full and half displacement (2-speed) motors driven through planetary reduction unit for positive control under all load conditions.
- Combined winch mode merges the hydraulic flow of two pumps for high-speed operation for either the main or auxiliary winch.
- Grooved lagging
- Power up/down mode of operation
- Hoist drum cable follower
- Drum rotation indicator
- Drum diameter: 16 in (40.6cm)
- · Rope length:
 - Main: 670 ft (204.2m)
 - Auxiliary: 670 ft (204.2m)
- Maximum rope storage: 834 ft (254.2m) · Terminator style socket and wedge

Hydraulic System

Counterbalance Valves – All hoist motors, boom extend cylinders, and boom hoist cylinders are equipped with counterbalance valves to provide load lowering and prevents accidental load drop when hydraulic power is suddenly reduced.

Counterweight

Standard - Total of 15,000 lb (6 803.9kg) of total counterweight consisting of one, removable 15,000 lb (6 803.9kg) counterweight with capacities for 0 lb (Okg) and 15,000 lb (6 803.9kg) counterweight configurations.

Optional - Hydraulic counterweight removal controlled from the left side of the upper structure.

R

4 5486 (supersedes 5473) – 0706 – D7

Carrier

General

- 10 ft 10.5 in (3.31m) wide
- 12 ft 7 in (3.83m) wheelbase (centerline of first axle to centerline of second axle).

Frame - Box-type, torsion resistant, welded construction made of high tensile steel. Equipped with front and rear towing and tie-down lugs, tow connections, and access ladders.

Outriggers

Boxes – Two double box, front and rear welded to carrier frame.

Beams and Jacks – Four single stage beams with Confined Area Lifting Capacities (CALC[™]) provide selectable outrigger extensions of full, intermediate, and retracted. Hydraulically controlled from the operator's cab with integral check valves.

Pontoons – Four lightweight, quick release, 23.50×27.25 in $(59.69 \times 69.22 cm)$, hexagonal steel pontoons with contact area of 485 in^2 $(3\ 129 cm^2)$ can be stored for road travel in storage racks on the carrier.

Main Jack Reaction – 94,800 lb (*43 000.6kg*) force and 196 psi (*1 351.4kPa*) ground bearing pressure.

■ Steering and Axles

Steering – Three independent modes consisting of two wheel front, four wheel, and crab. Each mode is controlled from the steering wheel and is selected by a switch in the operator's cab.

Drive – Two modes: 4 x 2 and 4 x 4 for off highway travel **Axle 1** – Steered, non-driven for 4 x 2 and steered, driven for 4 x 4

Axle 2 - Steered, driven

Suspension

Front - Rigid mount to the carrier frame

Rear — Center pin mount that pivots within bronze bushings. Two hydraulic oscillation cylinders lockout when the upper structure rotates 2.5° past centerline.

■ Tires and Wheels

Front and Rear – Four (single) 29.5 x 25–28 ply rating, earthmover type tires on steel disc wheels

• Spare tires and wheels - optional

Brakes

Service – Full hydraulic, dual circuit, disc type brakes on all wheel ends

Parking/Emergency – Spring loaded type, acting on front axle

■ Electrical

Three batteries provide 12 volt operation and starting **Lights**

- Front lighting includes two main headlights, and two parking/directional indicators.
- Side lighting includes two parking/directional indicators per side.
- Rear lighting includes two parking/directional indicators, two parking/brake lights, and two reversing lights.
- Other equipment includes hazard/warning system, cab light, instrument panel light, and signal horn.

Engine

| Specification | CAT 3126B | | | | |
|--|-------------------------|--|--|--|--|

Based on a gross vehicle weight of 102,000 lb (46 266.4kg). Crane operating angle must not exceed 35° (77% grade).

■ Fuel Tank

One 95 gallon (359.6L) capacity tank

■ Hydraulic System

All functions are hydraulically powered allowing positive precise, control with independent or simultaneous operation of all functions.

Main Pumps

- Four fixed displacement gear pumps for the main and auxiliary winches, swing, boom hoist, and telescope circuits with a manual disconnect to aid during cold weather starts
- One gear pump for the outriggers, power steering, and telescope circuits.
- One pressure compensated piston pump is used in the control, service brake, and counterweight removal circuits
- Combined pump capacity of 167.3 gpm (633.3Lpm).

Hydraulic Reservoir – 160 gal (605.7L) capacity equipped with sight level gauge. Diffusers built in for deaeration.

Filtration — One 10 micron, full flow, line filter in the control circuit. All oil is filtered prior to return to sump tank. Accessible for easy filter replacement.

Pump Drive

All pumps are mechanically driven by the diesel engine. Main and auxiliary winches, swing, boom hoist, and telescope pumps are mounted to a mechanical pump disconnect on the transmission torque convertor to aid in cold weather starting.
